

NIDA ZAHRA

Lahore, Pakistan | 03224411013 | nidazahra5322@gmail.com | github.com/Nidazah | linkedin.com/in/nidazahra24

PROFESSIONAL SUMMARY

Computer Science student specializing in AI, Machine Learning, and Web Development with hands-on experience in LLM integration, Backend Development, API Development, and browser automation. Proficient in building AI-powered applications using Python, FastAPI, and OpenAI/Groq APIs. Seeking a Summer Internship to apply technical skills and deliver real-world solutions.

EDUCATION

BS in Computer Science — Govt. Graduate College Samanabad, Lahore	2023 – Present
Intermediate ICS (Economics) — Lahore College for Women University	2022 – 2023
Matriculation (Computer Arts) — Unique Academy	2020 – 2021

TECHNICAL SKILLS

Programming:	Python, C++, JavaScript
Frontend:	HTML, CSS, Tailwind CSS
Backend:	FastAPI, RESTful APIs
AI / ML:	LLM Integration (OpenAI, Groq/LLaMA 3.1), Prompt Engineering, Machine Learning
Automation:	Selenium, SpeechRecognition, PyAudio
Database:	MySQL
Tools:	Git, GitHub, VS Code

ACADEMIC PROJECTS

AI Career Navigator [\[GitHub\]](#)

Tools: FastAPI, Groq API (LLaMA 3.1), pdfplumber, Tailwind CSS, Chart.js, JavaScript

- Developed an AI resume analysis system using Groq LLM to extract skills and recommend target career roles.
- Built a roadmap generator with learning plans and Chart.js visualizations comparing current vs. target proficiency.
- Integrated a real-time AI chat assistant with conversation history and responsive Tailwind CSS UI.

WanderWay – Travel Booking Platform [\[GitHub\]](#)

Tools: HTML, CSS, JavaScript, Font Awesome, Unsplash API

- Built a full-stack travel booking platform with dynamic package cards and real-time form validation.
- Implemented live booking summary updates and responsive UI with toast notifications.

Voice-Controlled Browser Bot [\[GitHub\]](#)

Tools: Python, Selenium, SpeechRecognition, PyAudio

- Developed a browser automation bot using Selenium and SpeechRecognition to execute voice-driven web commands.
- Implemented search, navigation, and scroll control via real-time speech-to-text processing.

AI New Year Planner [\[GitHub\]](#)

Tools: Python, OpenAI API, JSON, Datetime Module

- Built an AI-powered planner using OpenAI API to generate structured, personalized goal plans from user input.
- Demonstrated REST API integration and backend logic using Python and JSON data handling.

Catch Gojo Saturo – GUI Game [\[GitHub\]](#)

Tools: Python, Turtle Library, Random Library

- Designed an interactive GUI game in Python featuring scoring logic, movement mechanics, and event handling.
